

We are pleased to offer a tremendous opportunity for a **Gas Demand Modeler** to join our **Gas and LNG** team in **Edinburgh**. You will define our regional demand view and help strengthen the future of the gas practice. Our Gas and LNG team is responsible for our short-term and long-term gas supply, demand and pricing forecasts. The team closely tracks key trends and developments in Gas and LNG, focusing on a combination of global and regional market dynamics.

### **About you and how you can excel in this role**

The role is ideal for someone who is passionate about forecasting and modeling. You will have an analytical mind and an eye for detail, with the ability to translate your findings into clear, coherent messages for a variety of audiences. You will have good planning and organisation skills, allowing you to manage your own workload. You are pro-active and able to use your unique experiences and understanding to influence others to make a real difference for us and our clients. You have the ability to foster strong working relationships and to develop professional networks. You are productive and driven in achieving your goals, but also support others in their development.

In addition, you will be able to demonstrate some or all of the following advantageous qualities:

- Experience of applying demand modelling techniques
- Strong quantitative and analytical capabilities, with advanced skills in Excel
- Comfortable with handling and preparing data (e.g. data cleaning and feature engineering/extraction)
- Desire to grow into a recognised expert in regional and global gas and LNG, both internally and externally
- Initiative and tenacity to drive demonstrable product enhancements to the gas and LNG suite
- Effective interpersonal, influencing and communication skills
- The ability to work as part of a global team, involving multiple locations and time zones
- The ability to demonstrate applied knowledge of a programming language
- Degree-qualified in data science, econometrics, or statistics or other relevant fields with a strong quantitative focus such as economics, engineering, physics
- Fluent English language skills, both oral and written

## About the role

Joining a team of gas and LNG analysts across the EMEARC region, you will work with colleagues across geographies and time zones, quickly contributing to our world-class gas, LNG and energy market analyses delivered to clients across the globe.

You will be responsible for driving the European gas demand view, working closely with other analysts to generate a regional gas demand outlook which is robust and coherent, through the development of proprietary tools, models and methodologies.

While the role has statistical elements, it will also require you to follow broader market and policy developments, allowing you to develop into a well-rounded expert. As such, you will work closely with teams across the energy markets, power, downstream, chemical, coal, metals and upstream sectors.

You will need to have the passion and drive to take advantage of the tremendous opportunity to develop into a leading expert in European gas markets, both internally and externally. While your main role will be the ongoing development of models and tools to support our gas demand view, you must be comfortable interpreting and articulating your findings and delivering to colleagues and clients in a timely and insightful manner.

You will work alongside our industry experts, so you should be a motivated team player with a willingness to learn. And you must have the initiative, tenacity and influencing skills to drive improvements across Wood Mackenzie's gas and LNG product suite.

Building on Wood Mackenzie's world-class gas and LNG research, this is an extremely exciting time to take a leading role in strengthening our gas demand outlooks as industry and policy-makers worldwide seek a clear view on an energy world in transition.

## Closing Date and other key dates to remember...

The closing date for this role is **Monday 21<sup>st</sup> January 2019** and all applications will be reviewed after this date. If you are successful in being progressed to the next stage, you will be sent a short video interview and tests to complete on **Friday 25<sup>th</sup> January**. An Assessment Centre for this role will be held week commencing **Monday 18<sup>th</sup> February**.

## **What you'll love about Wood Mackenzie**

For the past 45 years, we have established our reputation as a trusted source of knowledge and forward-looking insight for the world's most innovative organisations.

Our teams are located around the world, and deliver research and consulting projects based on our assessment and valuation of thousands of individual assets, companies and economic indicators such as market supply, demand and price trends. As a result, we can count the world's key energy institutions and governments among our most loyal clients.

We are committed to supporting our people to grow and thrive. We value different perspectives and aspire to create an inclusive environment that encourages diversity and fosters a sense of belonging. We value everyone's contribution and support them to reach their full potential while sustaining an organisational culture of health and well-being. There are opportunities to get involved in our Wellness, Diversity and Inclusion, and Community Engagement initiatives. We actively support flexible working and are happy to consider alternative work patterns, taking into account your needs and the needs of the team or division that you are looking to join.
